

CHEM 1151 : Survey of Inorganic Chemistry Lab

Provides an introduction to basic chemical principles and concepts which explain the behavior of matter. Topics include measurements and units, structure of matter, chemical bonding, chemical reactions, gas laws, liquid mixtures, acids and bases, salts and buffers, and nuclear chemistry.

Credits 3

Prerequisites

[MATH 1111](#) or [MATH 1101](#)

Corequisites

CHEM 1151L
