

MATH 1103: Quantitative Skills & Reasoning

This course focuses on quantitative skills and reasoning in the context of experiences that students will be likely to encounter. The course emphasizes processing information in context from a variety of representations, understanding of both the information and the processing, and understanding which conclusions can be reasonably determined. Students will use appropriate technology to enhance mathematical thinking and understanding. Topics covered in this course include: sets and set operations, logic, basic probability, data analysis, linear models, quadratic models, exponential and logarithmic models, geometry, and financial management.

Credits: 3

Prerequisites:

minimum Next Gen ACCUPLACER Algebra score of 245.

Co-Requisites:

None.

Program: [Mathematics](#)
